Professional Summary

Aspiring Data Analyst with hands-on experience developing interactive dashboards and performing data analysis using Power BI, SQL, Python, Excel, Tableau, Snowflake, and AWS. Skilled in data cleaning, exploratory data analysis (EDA), KPI reporting, ETL workflows, data visualization, dashboard development, and dimensional data modeling. Experienced in transforming raw datasets into actionable business insights across finance, retail, agriculture, and sports analytics projects. Seeking a Data Analyst Internship to apply analytical, problem-solving, and stakeholder-communication skills in a professional environment.

Education

Rama University, Kanpur, Uttar Pradesh

Bachelor of Technology (B.Tech) — Computer Science Engineering

Intermediate (PCM), 2022 — 76%

Expected Graduation: 2027

CGPA: 8.5 / 10

High School, 2020 — 80%

Technical Skills

Programming Languages: Python, SQL, Java, JavaScript

Data Analytics & BI: Power BI, Tableau, Advanced Excel (Pivot Tables, VLOOKUP), DAX, Power Query, Dashboard Development, Data Visualization, Data Modeling, KPI Reporting

Databases & Cloud: MySQL, SQL Server, Snowflake, AWS, ETL Pipeline Development

Analytical Techniques: EDA, Data Cleaning, RFM Analysis, Root Cause Analysis, Trend Analysis, Data Quality Checks

Tools: Git, GitHub, Jupyter Notebook, Postman

Soft Skills: Analytical Thinking, Problem-Solving, Stakeholder Communication, Attention to Detail, Data Storytelling

Key Projects

Loan Default Risk Analytics Dashboard | *Power BI, DAX, SQL, Star Schema*

- Developed an end-to-end financial risk dashboard in Power BI analyzing 255,000+ loan applications via a star-schema dimensional model with interactive drill-through analysis.
- Created 25+ advanced DAX measures to evaluate credit score, debt-to-income ratio, and demographic variables.
- Identified a 15% high-risk applicant segment, enabling data-driven risk mitigation recommendations.

Agriculture Analytics Dashboard | *AWS, Snowflake, Power BI Service*

- Built a cloud-based analytics pipeline on AWS and Snowflake to analyze 5+ years of regional climate and crop yield data.
- Automated scheduled Power BI Service refreshes via Snowflake integration, reducing manual refresh effort by 60%.
- Delivered dashboards tracking rainfall, temperature, and production trends to support agricultural decision-making.

Superstore Business Analytics Dashboard | *Python, Pandas, Power BI*

- Performed EDA on 10,000+ retail transactions using Python and Pandas to uncover purchasing behavior trends.
- Applied the RFM framework to segment customers and identify high-value revenue-generating groups.
- Built an interactive Power BI dashboard with 15+ KPI visualizations for pricing, inventory, and retention decisions.

IPL Performance Analysis Dashboard | *Power BI, SQL, DAX*

- Analyzed historical IPL performance across 1,000+ matches and 17 seasons using SQL and Power BI.
- Built advanced DAX calculations to evaluate team win-rates, toss impact, and venue performance.
- Converted complex match datasets into an interactive dashboard for data-driven performance storytelling.

Certifications

- Deloitte Data Analytics Job Simulation — Deloitte
- Data Analysis with Python — IBM
- Complete Data Analyst Bootcamp: Basics to Advanced — Udemy
- Power BI Report Design — Udemy
- SQL for Data Analysis — Udemy

Core Competencies

Data Analysis | Dashboard Development | Business Intelligence | Data Visualization | EDA | KPI Reporting | Data Modeling | ETL Concepts | SQL Query Optimization | Report Automation | Data Storytelling | Analytical Thinking
