PROFESSIONAL SUMMARY

Data Analytics enthusiast skilled in Power BI, SQL, Python, Tableau, AWS, and Snowflake. Experienced in building analytics dashboards across finance, retail, agriculture, and sports domains. Strong expertise in data visualization, exploratory data analysis, SQL querying, ETL pipelines, KPI reporting, and business insight generation.

TECHNICAL SKILLS

Programming: Python, SQL, Java, JavaScript

Data Analytics & Business Intelligence: Power BI, Tableau, DAX, Power Query, KPI Reporting, EDA, Data Visualization, Data Modeling

Databases & Cloud: MySQL, SQL Server, Snowflake, AWS, ETL Staging

Tools & Frameworks: Excel, Git, GitHub, Jupyter Notebook, Postman

KEY PROJECTS

Loan Default Risk Analytics Dashboard

Power BI, DAX, Dimensional Modeling

- Developed an end-to-end financial risk dashboard analyzing 255,000+ loan applications with interactive drill-through analysis and 25+ advanced DAX measures.
- Implemented star schema dimensional modeling to isolate a 15% high-risk applicant segment using credit score, debt-to-income ratios, and demographic variables for proactive risk mitigation.

Agriculture Analytics Dashboard

AWS, Snowflake, Power BI Service

- Engineered a cloud-based agriculture analytics platform leveraging AWS for storage and Snowflake data warehousing to analyze 5+ years of regional climate and crop yield trends.
- Integrated Snowflake seamlessly with Power BI Service for scheduled automated cloud reporting, reducing manual dashboard data refresh cycles by 60%.

Superstore Business Analytics

Python, Power BI, RFM Framework

- Conducted exploratory data analysis (EDA) on 10,000+ retail transactions utilizing Python (Pandas, Seaborn) and executed an RFM analysis framework to isolate top revenue-driving customer segments.
- Designed an interactive dashboard containing 15+ optimized KPI visualizations targeting dynamic pricing, product performance, and retail inventory adjustments.

IPL Performance Analysis Dashboard

Power BI, DAX, SQL

- Built a comprehensive sports analytics system analyzing historical performance metrics across 1,000+ IPL matches and 17 tournament seasons.
- Formulated complex DAX calculations to evaluate team win-rates, toss influence, and pitch conditions to transform raw performance data into actionable tactical storytelling.

EDUCATION

Rama University

Bachelor of Technology in Computer Science Engineering

Kanpur, Uttar Pradesh

Expected Graduation: 2027

- Current Cumulative Grade Point Average (CGPA): 8.5/10

Secondary & Higher Secondary Education

Class 12 (Intermediate Science — PCM)

Passed: 2022

76%

Class 10 (High School)

Passed: 2020

80%

CERTIFICATIONS

- Deloitte Data Analytics Job Simulation — Deloitte
- Data Analysis with Python — IBM
- Complete Data Analyst Bootcamp: Basics to Advanced — Udemy
- Power BI Report Design — Udemy
- SQL for Data Analysis — Udemy

CORE COMPETENCIES

Data Visualization — Dashboard Development — Business Intelligence — Exploratory Data Analysis — SQL Query Optimization — KPI Reporting — Analytical Thinking
